▲ **Lightweight and easily carried**

MST MINI ULV
Cold Sprayer/Fogger

The top is molded into a grip handle, so you can easily take your Mini anywhere.

The MST MINI ULV Cold Sprayer/Fogger is designed specifically for the proper deployment of all Artemis Bio-Oxygen® products, Disinfecting products and bug interceptor.

◤ KEY BENEFITS OVERVIEW

Adjustable flow and 18-inch heavy-duty flex-hose are designed to be lightweight and easily carried around for manual, directed spraying.

Functional and portable design. The bottom of the unit is a generously sized, detachable solution tank with an easy-fill valve and a capacity scale. The top of the unit is molded into a grip handle so you can take your fogger anywhere.

Delivers the perfect fog. The MST-MINI is engineered to deliver the perfect micron droplet at the perfect flow rate, maximizing efficacy, while avoiding over saturation.

Convenient, affordable and effective. Properly atomizing Artemis products with the MST-MINI cold ULV fogger will save you time and expense on your next job.

Built to last. The unit's vortex nozzle is designed to be clog resistant. The solution tank is made from rugged, chemical-resistant polyurethane. A one-way valve protects the engine from liquid backflow.

Designed for applying disinfectants, biocides, insecticides, Oil, and water-based solutions.

◤ FEATURES AND BENEFITS

- Recommend for Artemis products
- Corrosive resistant
- Atomizes the perfect droplet size
- Delivers recommended flow rate
- Spray distance of up to 15 feet
- 1-gallon reservoir

- Built to last
- Lightweight
- Affordable
- Compact
- 1-year warranty
