Bio-Oxygen® Chem Decon is based on technology originally developed and patented by scientists at Sandia National Laboratories. Artemis Bio-Solutions has been granted a license from Sandia (No. 00-C02678) to commercially manufacture this product for commercial and professional use. **Bio-Oxygen® Chem Decon** is a broad-spectrum hospital, institutional, home, and classroom disinfectant*.

Used in thousands of environmental remediation projects, Artemis **Bio-Oxygen® Chem Decon** is relied on throughout the restoration industry as an effective, versatile decontamination solution.

Covid-19 is caused by SARS-CoV-2. **Bio-Oxygen® Chem Decon** kills similar viruses and therefore can be used against SARS-CoV-2 when used in accordance with the directions for use against Feline calicivirus on hard, non-porous surfaces. Refer to the CDC website at cdc.gov for additional information.

Bio-Oxygen® Chem Decon is on:

- List N (Disinfectants for Use Against SARS CoV-2)
- List Q (Emerging Viral Pathogens)

Use Bio-Oxygen® Chem Decon as directed for all your restoration needs:

- Water and smoke damage restoration
- Sewer backup & river flooding mitigation
- Mold removal and stain removal
- Allergen† removal
- Carpet Cleaning and deodorizing
- Vehicle disinfection
- As a deodorizer for HVAC systems ductwork
- Effective on pet urine, feces, and other organic stains and odors

Bio-Oxygen® Chem Decon is the most effective decontamination solution in the restoration industry!

Bio-Oxygen® Chem Decon

*The most effective decontamination solution
in the restoration industry!*

Many Threats. One Solution.®

Artemis Bio-Oxygen Chem Decon is a product that is designed for bioremediation and decontamination purposes, particularly in the restoration industry. Here are some reasons why this product might be beneficial in the restoration industry:

- 1. Safe and Environmentally Friendly:** When used as directed Artemis Bio-Oxygen Chem Decon is formulated to be safe for both users and the environment. It utilizes oxygen-based chemistry to break down contaminants, avoiding the use of harsh chemicals that could potentially harm the environment or the surfaces being treated.
- 2. Bioremediation:** This product promotes bioremediation, which is the use of biological agents to break down and neutralize contaminants. This is especially useful in the restoration industry, where contaminants such as mold, bacteria, and other organic materials might be present.
- 3. Effective Against a Range of Contaminants:** Artemis Bio-Oxygen Chem Decon is designed to target a wide variety of contaminants, including mold, bacteria, viruses, and volatile organic compounds (VOCs). This versatility makes it suitable for various restoration scenarios, from water damage restoration to mold remediation.
- 4. No Residue:** After application and treatment, Artemis Bio-Oxygen Chem Decon breaks down into harmless byproducts, leaving no harmful residues behind. This can be important in restoration situations where residues could lead to long-term issues or reactions.
- 5. Odor Control:** The product is effective in neutralizing and eliminating odors associated with contaminants. This is crucial in restoration projects, as unpleasant odors can persist even after the visible contaminants have been removed.
- 6. Compatible with Various Surfaces:** Artemis Bio-Oxygen Chem Decon is designed to be safe for use on a wide range of surfaces, including fabrics, upholstery, carpets, wood, metal, and more. This versatility allows restoration professionals to use the product on various materials without concerns about damage.
- 7. Reduces Health Risks:** By effectively neutralizing contaminants, Artemis Bio-Oxygen Chem Decon helps to minimize health risks associated with exposure to mold, bacteria, viruses, and other harmful microorganisms. This is important for both restoration workers and the occupants of the restored spaces.
- 8. Preventive Application:** Beyond restoration projects, Artemis Bio-Oxygen Chem Decon can also be used preventively in areas that are susceptible to contamination or have a history of issues. This can help maintain a healthier indoor environment and prevent future restoration needs.
- 9. Ease of Application:** The product is typically easy to apply and can be integrated into existing restoration processes. It can be sprayed, fogged, or applied using other common application methods.
- 10. Industry Standards:** Many restoration professionals prioritize products that meet industry standards for effectiveness and safety. Depending on the specific requirements and regulations, Artemis Bio-Oxygen Chem Decon could be compliant with these standards.

Remember that the effectiveness of any product can depend on the specific situation and the nature of the contaminants involved. It's important to assess the situation, follow manufacturer guidelines, and consider professional advice when deciding to use a product like Artemis Bio-Oxygen Chem Decon in the restoration industry.
